Partners: University of Osnabrück (Germany), University of Castilla-La Mancha (Spain), University of Miskolc (Hungary), University of Szeged (Hungary), University of Pablo de Olavide (Spain).

PROGRAM

Title: «Science and knowledge in criminal justice in the era of (in)security»

Short description:

This Erasmus BIP aims at analysing the impact of new technologies in the field of crime prevention and criminal investigation to fight serious illicit activities. The concerns about the negative impact of organised crime on security, stability, the rule of law and sustainable development calls for an equivalent change in investigative strategies.

The Erasmus BIP is a blended course. Specifically, the first phase will be held partly online on 3rd July and 4th July and partly in presence on 6th and 7th July. The second phase will see physical participation and will consist of two different steps. The first one, from 10th July to 12th July, will provide workshops in which the topics of this program will be addressed under the supervision of professors and master and PhD students. The second step will be held on 13rd July and 14th July and will be committed to the presentation of the work resulting from the workshops. In this phase, students will report on their achievements and knowledge gained during the course.

APPLICATION PROCEDURE

Requirements:

- Elementary or medium level of English (A2, B1);
- Profile: Students;
- Availability for both the virtual component and the physical mobility.
